PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience building production cross-platform applications with Flutter (Android, iOS, Web) for international clients. Recently expanded into backend development with Python and FastAPI, including a full-stack AI-powered application using PostgreSQL and the Google Gemini API. Comfortable owning features end-to-end — UI, REST API, and database — and quick to adapt across the stack in fast-moving teams.

TECHNICAL SKILLS

Languages: Dart, Python, JavaScript, TypeScript, HTML, CSS

Frontend: Flutter, React (Vite), GetX, Provider, Material Design

Backend: FastAPI, SQLAlchemy, PostgreSQL, Firebase, REST APIs, JWT Authentication, Node.js

AI Integration: Google Gemini API, Prompt Engineering, AI Application Development

Tools: Git, GitHub, Dio, Alembic

PROFESSIONAL EXPERIENCE

Flutter Developer | Cross-Platform Mobile Engineer — NS Ventures *Mohali, Punjab | Dec 2024 – Nov 2025*

- Architected and delivered cross-platform Flutter applications (Android, iOS, Web) for international clients, including Sweden-based stakeholders, owning delivery end-to-end from requirements to production.
- Built FastAPI backend services and REST APIs powering production admin panels, CRM systems, and payment gateway integrations.
- Led Flutter UI/UX implementation for a marketing platform adopted by a Sweden-based fitness franchise; built a reusable component architecture that cut development time by ~30%.
- Collaborated in an agile, cross-functional environment with international project managers and backend engineers to ship maintainable, production-ready software.

Independent Software Engineer (Freelance) — Self-employed *Remote | Nov 2025 – Present*

- Designed and built DocMind, a full-stack AI-powered document assistant (Flutter, FastAPI, PostgreSQL, Google Gemini API) with JWT authentication, automatic PDF text extraction, and conversational Q&A with persistent chat history.
- Built and deployed a production restaurant website (React + Vite) for a freelance client, owning the full lifecycle — frontend development, custom domain setup, and hosting.

Flutter Developer Intern | Cross-Platform Mobile Engineer — Excellence Technology *Mohali, Punjab | June 2024 – Dec 2024*

- Developed an expense-tracker application with real-time budget tracking and robust local data persistence.
- Improved UI responsiveness and usability across multiple Flutter projects, cutting bug reports by ~40% through rigorous testing and code review.
- Integrated REST APIs and optimized performance via caching and refactoring, improving load times by ~25%.

KEY PROJECTS

DocMind – AI Document Assistant | [GitHub](#)

Full-stack AI document Q&A app — Flutter frontend, FastAPI backend, PostgreSQL + SQLAlchemy, JWT auth, and the Google Gemini API for question-answering with persistent conversation memory over user-uploaded PDFs.

Velora – E-Commerce App & Web Admin Panel | [GitHub](#)

Cross-platform e-commerce app with Firebase authentication, real-time inventory via Firestore, shopping cart, and secure checkout across mobile and tablet.

Dazz Drones – Web & App | [Live Site](#)

Production Flutter drone-booking platform and CRM with an admin panel, real-time booking management, and payment processing across Android, iOS, and Web; improved load time and UI smoothness by ~50% through refactoring and lazy loading.

Punjabi Brothers – Restaurant Website | [Live Site](#)

Freelance client site built with React + Vite; independently handled frontend development, custom domain registration, and hosting deployment.

EDUCATION

Bachelor of Computer Applications (BCA) — Guru Nanak Dev University (GNDU), 2024
